

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Please amend paragraph **[0015]** on page 3 as follows:

[0015] Fig. 3 is a block diagram of illustrating the functionality of an implementation of a resource finder tool.

Please amend paragraph **[0038]** beginning on page 9 as follows:

[0038] A services screen 316 may be provided to enable additional actions with the located resources. For example, in an implementation, the services screen for a hit-list of employee resources may provide a link to contact employees, to push information to the employees, survey the employee's opinions on a topic, to provide e-learning to employees having a common interest, to associate the employees into a community of people having a common interest, to provide the employee with a task and provide a task-related procedure to aid in guiding the employee to completion of the task. ~~In an implementation where the query returns a hit-list of,~~ This would allow you to run services, like starting a collaboration room already prefilled with everything you have gathered in a collection.
